

June 26, 2012 - For Immediate Release

Northern Apex Corporation announces that they are now offering a leasing option for their popular Gem-Where™ and Smart-View™ RFID solutions for jewelry.

Fort Wayne, Indiana based Northern Apex Corporation, creator of Gem-Where™, the original RFID (Radio Frequency Identification) solution for the jewelry industry, announces that they are now offering a leasing option for their jewelry solutions.

Northern Apex has partnered with a leasing company that understands the complexity of hardware/software solutions and has developed affordable leasing options for their popular Gem-Where™ and Smart View™ products. Northern Apex has standard packages available as well as custom packages that they can build to suit every customer's needs.

Kevin Knuth, Business Development Manager for Northern Apex Corporation said, "Leasing offers the advantage of a monthly payment, instead of paying for the system up-front, as well as tax benefits for some customers." Knuth continued, "RFID is here to stay and we feel that we have structured our leasing plans to enable jewelry stores and distributors to deploy the technology in their store/distribution center(s) with an affordable monthly payment."

About Gem-Where™:

Gem-Where™, deployed since 2006, is a state of the art Radio Frequency Identification (RFID) solution for the jewelry industry. For ease of use, Gem-Where™ integrates directly into a jewelry store's current point of sale software system. It also utilizes 900 MHz RFID technology, which allows to work well near metal objects or in display cases. Once jewelry is tagged with Gem-Where™ RFID smart tags, jewelers can significantly improve their inventory process, customer service and gain a better sense of security by knowing what they have and where it is located.

About Northern Apex:

Northern Apex (www.NorthernApex.com) is recognized and respected as a pioneer and a lead integrator in the world of RFID (Radio Frequency Identification) technology. Since 1998, Northern Apex has developed a reputation for innovation, customer focus and affordability providing both industrial and commercial RFID integrated components, engineered solutions and complete RFID turnkey systems. Northern Apex has fielded numerous custom RFID solutions by leveraging a keen understanding of the physics of RFID, a broad knowledge of the available technologies and a passion for customer service.
